

Dec. 1 - 1927.

Garfield - Robin (B. 24)

Health - somewhat delicate, easily tired, mouth breather, subject to colds (head), restless in sleep, very absorbed in his play.

Body - ribs high - back weak - shoulders tight - head not balanced - high state of tension

Report of progress

Dec. Enjoys lessons very much and ^{body} always responds very well, when not overtired in 10-15 min, otherwise little slower. Likes whatever is done to him, and to do any ex. Always find body tired and shows in expression. Lessons always rest body " " " "

Get off from table very happy and full of energy. Has had 2 colds this month and mother has followed my advice and prolonged rest periods. Reports that he has kept his ^{vitality} ~~activity~~ with his colds better than ever has before. X-ray treatment helped condition very

Jan. much. Would say that school is a trifle too much, for general cond. & posture lowered at end of each week, and improved by lesson, and rest over week end.

Feb. Mch. - Slow improvement - Much better latter part of Mch.

Ex. given.

Roll like egg sideways - endways

Climb ladder

South wind

Sit on heels - dive

sitting position - tent - man in tent

circle with legs

game smelling flowers - doll shutting eyes as go down -

shutting hands and feet - mouth - nose - eyes - ears

topping on knee with elbow - kissing knees
